

SPECIAL INVITATION

Join us to support open data for all with an always-on digital convening for collective impact in social problem solving

X4Impact is the leading online market intelligence platform for social innovation. We created this free-access platform to offer the insights and connections needed to support NGOs, social entrepreneurs, governments, and funders that are creating or taking to market Technology for the Public Interest.

Adopt an UN SDG: \$75,000-\$125,000

We want X4Impact to continue to be a free resource for all and we invite you to adopt one of the 17 United Nations Sustainable Development Goals. Funding ensures the ongoing curation of social challenges, tech solutions, trustworthy sources, and data intelligence to support innovation.

With your support, we can continue operationalizing this work including:

- Aggregating new datasets, creating interactive tools such as: [Hunger in the US - Interactive Report](#)
- Continuing to grow the number of Challenges seeking ideas or funding.
- Curating grants and tech solutions under that UN SDG as a service to the global community.
- Nurturing a community of social entrepreneurs behind these tech solutions. We provide tactical support and help with capacity building via outreach, webinars, special reports, mentoring, and connections.

Recognition for each sponsored UN SDG appears under each Global Goal title

“X4Impact is a knowledge hub. It unleashes the understanding and the insights that nonprofits, technologists, academia, government, funders, and social entrepreneurs need.”
